Description : Description du produit
Once he slipped to a sitting position, drew back the little curtain over the porthole, and stared out. There was little to be seen; but by the sight of a lake of soft light that slid past at some incalculable depth a dozen miles away, he perceived that they had left the sea far behind and were spinning over the land of France. He looked out long, revolving thoughts and conjectures, striving to find some glimmer of memory by which he might adjust these new experiences; but there was none. He was like a child, with the brain of a man, plunged into a new mode of existence, where everything seemed reversed, and yet astonishingly obvious; it was the very simplicity that baffled him. The Christian religion was true down (or up) even to the Archangels that stand before God and control the powers of the air.

Publisher comments THE DAWN OF ALL, the second of Benson's two science fiction satires, is a "counter-blast" to the terrifying LORD OF THE WORLD. Contradicting the notion that this novel presents a blueprint for an ideal society, "Benson wrote often and emphatically that he did not for a moment expect the pictured solution to realize itself, and that he even hoped it would not. Neither Science, nor the State, nor Religion would ever, he was convinced, find themselves in such mutual relations as he had invented." (C. C. Martindale, S.J.)
